

Instructions

Lantern Making Kit

What is in the box:

4 x Stick-It Panels
8 x Metal Rings
1 x Roll of Double-Sided Tesa Tape
4 x Circular Base Discs
4 x Circular Candle Holder Discs
4 x Edging Tools

Before you get started you will need:

- Covering of choice
- Clean flat working area
- Sharp Knife or Scissors
- Battery Tea Lights*

**Important info:* There are 2 versions of the Lantern Making Kit, with or without Battery Tea Lights. The Tea Lights will be included depending on which Kit you have purchased.

the video tutorial

1
Cut down your covering to a workable size.

2
Lay your covering face down.
Peel back some of the release paper.

3
Place the panel over your covering with the adhesive side down.

4
Remove the rest of the release paper, smooth out from the middle as you pull.

5
Turn the panel over and press your covering into the adhesive firmly.

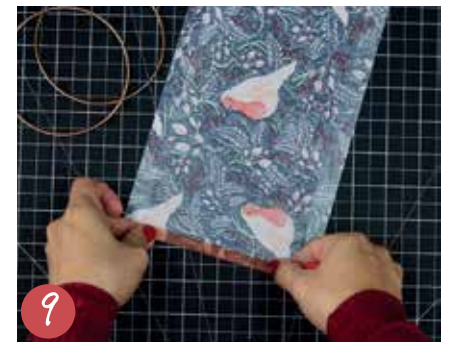

6
Cut off the surplus covering.

7
Snap back the creased edges around the panel until the kiss-cut strip breaks.

8
Carefully remove the kiss-cut strips to avoid fraying.

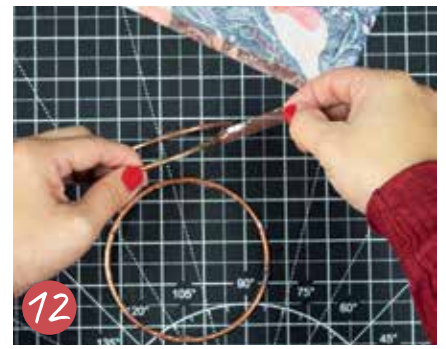

9
Put a strip of tape on the edge of the panel, this will be used to stick the seam.

Stick the double-sided Tesa tape to the outside of the rings and cover the edges all the way round.

Press the Tesa tape down evenly and firmly onto the rings.

Remove the release paper. You'll now have two sticky rings.

Put the sticky rings on the edge of the panel, not the covering. Start rolling the rings along the panel edge, keeping in line with the edge.

Remove the release paper from the seam edge. When you get to the overlap the adhesive will join the panel together.

Press the seam firmly together on the inside using a flat surface to rest on.

Fold over the surplus covering all the way around on both sides, so it covers the rings.

Use the edging tool to push the surplus covering behind the rings.

Place the base disc inside the lantern, it rests on the lip of the bottom ring.

Place the battery Tea Light Holder disc on top.

Insert your Battery Tea Candle in the lantern.

Enjoy your professionally finished lantern!
